L
MCA
right ICA
right CCA
brachiocephalic trunk
iliac artery
right femoral artery (access)
Neurovascular robot (modules on a rail)
Tasks 1–2: femoral access → right ICA
(task 1: 0.035 in guidewire, model not yet chosen; not to scale)
clinical goals: MCA thrombectomy (b)
and aneurysm embolisation (c)
teleoperated robots in patients: arch → CCA and ICA (cerebral angiography)
aortic arch (Type I drawn; arch type varies)
descending aorta
b
0.014 in guidewire (0.36 mm)
thrombus
A1
M1 segment, drawn 3.0 mm (human MCA 2.7–3.5 mm*)
6F aspiration catheter (2.0 mm; tip at the clot face)
ICA terminus
2 mm
lateral
c
coil embolisation
intrasaccular device
saccular aneurysm
coils
Woven EndoBridge (WEB)
